Education

Sahyadri College of Engineering and Management — **Mangalore, Karnataka**
Bachelor of Engineering in Computer Science and Engineering - ***CGPA: 9.28*** — *2023 - Present*

Experience

Datavex AI Pvt. Ltd. — **On-Site**
Software Engineering Intern — *Mar 2026 - Present*

- Developed full-stack features for MedConnect, an enterprise healthcare orchestration platform, utilizing Next.js, FastAPI, PostgreSQL, and Docker.
- Built role-based administrative portals and multi-service modules with secure backend API integration, session handling, and structured validation.
- Implemented containerized microservice workflows and shared UI/authentication components adhering to clean architecture standards.

Projects

DGA Sentry – AI Threat Intelligence & DGA Detection Platform | *Python, FastAPI, XGBoost, React, TypeScript, Docker* — **Oct 2026**

- Architected a full-stack cybersecurity platform using XGBoost and lexical feature engineering to detect malicious Domain Generation Algorithms (DGAs), integrating live DNS telemetry, response caching, and automated model drift detection.
- Built a React & TypeScript security workbench for bulk domain auditing and real-time ROC/confidence visualization, containerized via Docker Compose with automated Pytest, Vitest, and GitHub Actions CI/CD pipelines.

Zerodha Clone | *React.js, Node.js, Express.js, MongoDB, JWT, Passport.js* — **Jun 2026**

- Developed a full-stack stock trading platform with secure authentication, portfolio management, and an interactive trading dashboard.
- Implemented REST APIs for watchlists, holdings, positions, and order management using MongoDB.

Student Result Management System | *Java, Swing, JDBC, MySQL* — **Jun 2026**

- Developed a desktop-based student result management system using MVC architecture with secure CRUD operations.
- Automated SGPA/CGPA computation, report generation, and built a modern Java Swing interface.

Sentinel Agents Security Engine | *Python, FastAPI, Next.js, Docker, Tree-sitter, TypeScript* — **Feb 2026**

- Built an autonomous AI-driven security platform for repository-wide vulnerability analysis using AST parsing, Docker sandboxing, and LLMs.
- Developed a modular multi-agent pipeline with a Next.js dashboard for real-time scanning, exploit validation, and security reporting.

Technical Skills

Languages	Java, Python, JavaScript, TypeScript, SQL, C
Frameworks & Web	React.js, Next.js, FastAPI, Node.js, Express.js, Tailwind CSS, Vite
Databases & Cloud	PostgreSQL, MongoDB, MySQL, Prisma ORM, Cloudinary
DevOps & Testing	Docker, Docker Compose, GitHub Actions (CI/CD), Pytest, Vitest, Git, Linux (Fedora, Bash)
AI, ML & Concepts	XGBoost, Scikit-learn, Model Drift Detection, Google Gemini API, Ollama, REST APIs, DSA

Achievements

Hackathons	Secured **Top 3** positions across **4 hackathons**; selected by institute for **SIH 2025**; competed in **GDG Solution Challenge**.
Competitive	Solved **105+** DSA problems on LeetCode; earned **5-Star** badges in Java and C on HackerRank.
Open Source	Active contributor to community-driven GitHub repositories and personal open-source projects.
